MAXI HP - Tungsten Carbide Plasma Coated ingle channel impeller submersible for 40mm solids handling

The 400/3/50 Maxi HP submersible has a hard faced impeller and volute designed for handling abrasive pumped media with density to max. 1.2kg/dm³. It can handle solids in suspension up to 40mm dia. at temperatures up to 40°C.

It features a single channel impeller mounted on a reduced length shaft designed for high hydraulic efficiency.

G250 cast iron construction • Mechanical seal - silicon carbide • Lip seal and O-rings in Nitrile • Oil chamber • Asynchronous 2850rpm motor suitable for >15 starts per hour • 10m Neoprene HO7RN-F cable as standard • ATEX option
